Your Guide to a Business Building. **We Build on Your Land**

*IBS Plan #500, 5000 Square Feet, 5-Work Bays, 1-Office, 1-Bathroom*

## Inco Building System: Smart Buildings for Business Owners

By Baze Dane

Welcome to Inco Building Systems. The pre-engineered metal building construction system designed for small businesses and available in a variety of building sizes. All building packages have a finished bathroom and office.

When an Inco client selects a turnkey plan package, their building is ready for immediate use after construction on their land. Plans include a steel frame building, automation, foundation, plumbing, electrical, insulation, doors, windows, interior finishes, and certified professional labor.

All plan packages are engineer-designed to comply with all local building codes, primarily located in Cary-Raleigh, North Carolina; essentially offering a complete, customizable metal building solution from one company.

### WHAT'S NEW

#### KEY POINTS OF THE INCO BUILDING SYSTEM

Turnkey Engineered Metal Buildings in the Cary-Raleigh NC area.
**We Build on Your Land**

#### SMART BUILDINGS

Intelligent buildings that can be managed on-site or remotely.

#### READY TO BUILD YOUR BUSINESS?

Build your business in a 2500 to 7900 square foot space.

# Identifying Key Points of the Inco Building System

By Zack Light

### Engineered Metal Building Focus:

Inco offers pre-engineered metal buildings fabricated from red iron I-beam steel, as well as cold-formed steel (CFS), which is galvanized for corrosion resistance.

### Turnkey Construction:

Inco takes responsibility for the entire building process, including structural engineering and design, building permits, foundation construction, building erection, thermal insulation, window and door installation, roof and wall panel cladding, plumbing and electrical systems.

### Customization Options:

While offering a standard building system, Inco allows for customization with choices for site preparation, mechanical systems, insulation levels, door and window types, interior finishes, and more to suit specific project needs and requirements.

### Local Expertise:

Primarily serving the Cary-Raleigh, North Carolina area, Inco is considered a local specialist for pre-engineered metal building construction.

# Smart Buildings

By Kane Raisor

Intelligent buildings that can be controlled on-site or remotely, including the ability to unlock, open, close rollup doors, and lock your building from anywhere in the world.

Whether on site or remotely, building owners can schedule, monitor, and manage multiple systems within their smart buildings via internet connection.

# Solution Planning

By Robin Banks

It's important to choose the right building that will make you money!

When you work with Inco Building System for solution planning, you can be assured that your new pre-engineered metal building will meet your business' needs in terms of size, price, and design.
